

3308/3508/3508W/3558

The Ultimate Cleaning Muscle

Nilfisk CFM's 08 Industrial Vacuum Series delivers long-lasting cleaning power in an ergonomic design. These robust vacuums are accessible, adaptable, transportable, and comfortable to operate. Every detail of the 08 Series is engineered to make your job easier...your operation, more productive.

- *Clean for hours at a time without stopping for maintenance.*
- *Maneuver the vacuum anywhere it's needed without straining.*
- *Customize the unit by effortlessly interchanging your choice of hoses and accessories.*
- *Efficiently collect a variety of materials, including toxic, hazardous, and nuisance dust, debris, and liquids.*

The reliable 3308-The 3308 quickly removes dirt, debris and liquids. Its efficient operation makes daily cleaning in production areas and process manufacturing fast and hassle-free.

The powerful 3508-Thanks to its strong suction power, the 3508 efficiently collects heavy materials, oil, emulsions, swarf, solids and liquids. A large, 26-gallon collection container also makes it ideal for a wide range of accessories.

The versatile 3508 W-The 3508 W delivers impressive power and air-flow rate, enabling it to swiftly collect and retain a wide range of materials. It's also designed for use in either central systems, process-integration systems, or for general plant maintenance.

The high-capacity 3558-Cleaning large quantities of dust and flyaway debris is no problem for the 3558 with its high filtering capacity and air-flow rate. Despite its power, the 3558 is quiet for worker safety and comfort.

You asked for new features that would help make your job easier-and we delivered. Each Nilfisk CFM 08 model includes features that enhance both performance and usability.

- **Modular Construction:** All Nilfisk CFM 08 models are made of durable, high-alloy steel but are also available in stainless steel.
- **Portable Design:** Equipped with extra large wheels and a wrap-around handle, you can push, pull or maneuver your 08 vacuum anywhere with ease.
- **Efficient Filtration:** Our exclusive filtration system is #1 in the industry with HEPA and optional ULPA filters that trap up to 99.999% of all ultra-fine particles. Graduated filtration technology with oversized main filters and self-cleaning filter options also eliminate premature clogging and extend filter life.
- **Protective Shield:** A tough protection shield after the inlet allows you to trap abrasive materials, such as glass or stones, without damaging the inner surface of the vacuum's collection container.
- **Low Noise Operation:** The Nilfisk CFM 08 vacuums are quieter than ever, with a sound suppressor that reduces the speed of the exhaust air and muffles the sound for increased worker safety and comfort.

- **Tangential Inlet System:** Our innovative inlet system provides a more natural, side entrance into the vacuum, which allows for a better cyclonic effect. The result is maximum suction power for longer periods of time.

- **Ergonomic Filter Shaker:** Our manual filter shaker handle allows you to safely purge filters to prevent clogging and downtime. Simply move the external handle back and forth to shake filters clean without opening the vacuum. Reverse purge and electric filter shakers are also available.

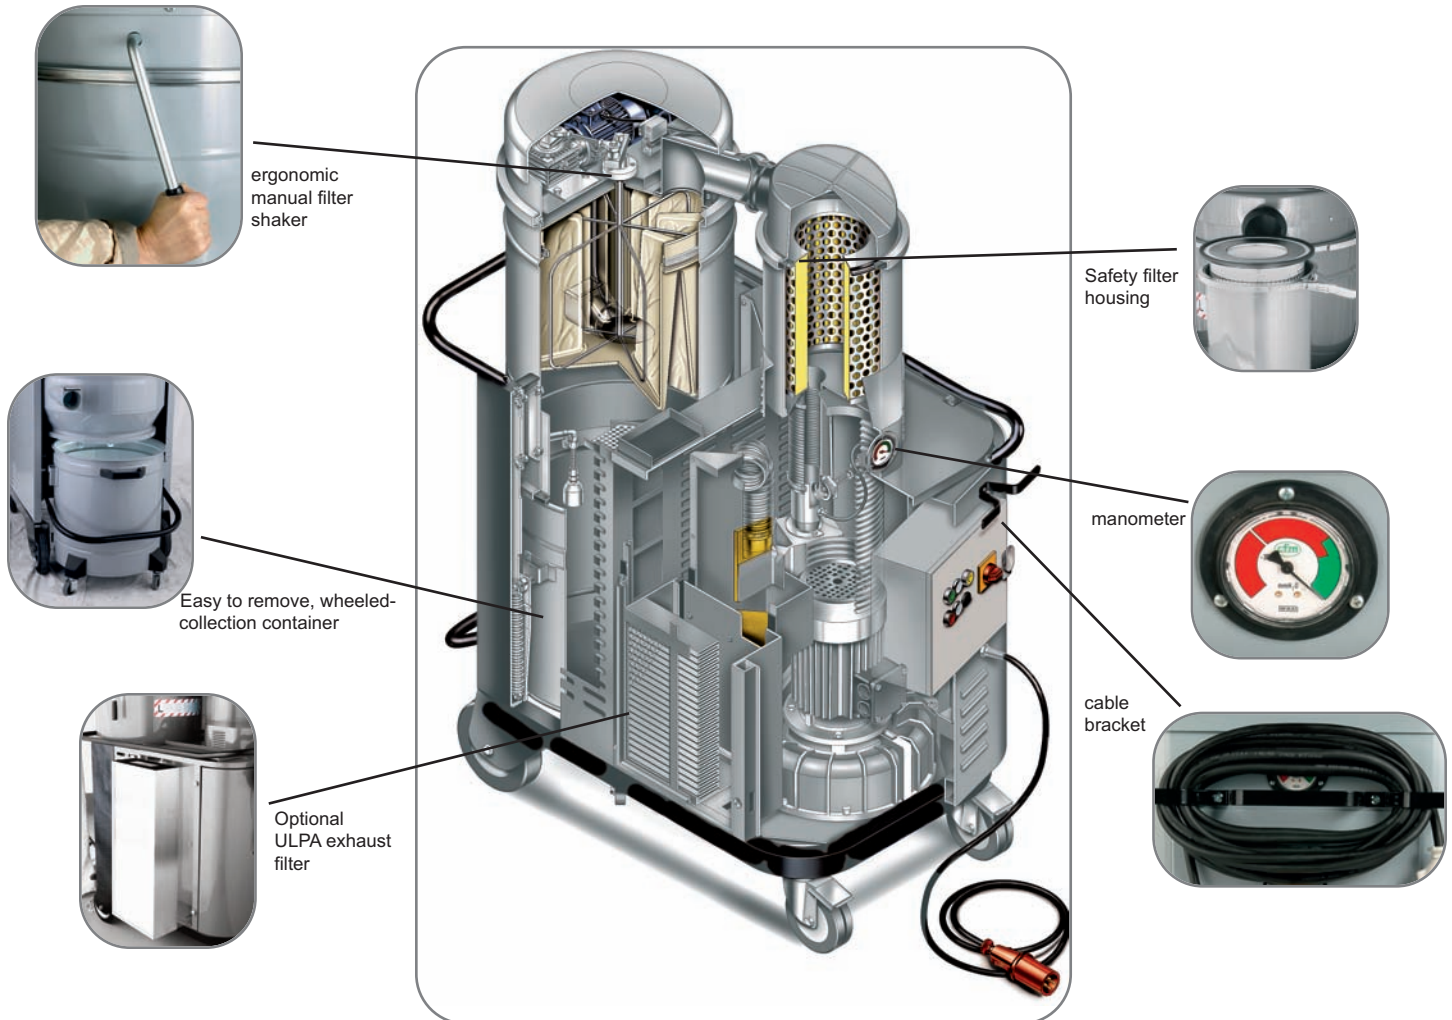

Largest Selection of Accessories, Options & Filters to Support all your Cleaning Needs!

Whether you are collecting fine paint powders in a powder coating facility, debris in a food plant, or oil and metal chips in a metalworking environment, we have the range of options and expertise to create a cleaning solution for you.

Choose from a range of specialized filters for everything from static control to toxic material collection. Looking for a specific brush, nozzle, hose, or other attachment? Nilfisk CFM offers the largest assortment of accessories in the industry.

Technical Features		3308	3508	3508W	3558

Innovations Inside the 08 Series Vacuum

Optional Features

- Stainless Steel Filter Chamber, Collection Container and Chassis - allows for easy cleaning and improved sanitation.
- Wet Shut-Off Kit - protective kit simply mounts inside the filter chamber to automatically shut down the vacuum during liquid collection if liquid level rises too high.
- Electric Filter Shaker - enhances vacuum performance by oscillating the filter back and forth to continuously shake the filter clean during operation.
- ABS Container - used in place of collection container for safe disposal of toxic and hazardous materials.
- Paper Bag Kit - converts collection container to accept paper dust bags.
- Polyliner Adapter Kit - converts collection container to accept polyliners.
